WINDIARTA

Software & AI Engineer / Jakarta, Indonesia

windiarta.widjaja@gmail.com
windiarta.my.id / linkedin.com/in/windiarta

PROFESSIONAL SUMMARY

Software & AI Engineer with 2+ years experience building enterprise-scale AI platforms and data infrastructure at a Fortune-500 state-owned enterprise. Deep expertise in FastAPI, Next.js/React, Google ADK, Snowflake Medallion Architecture, Data Vault 2.0, and Agentic RAG. Built a multi-agent AI platform serving 9 AI agents across 7 business units. Reduced LLM costs by 90%+, cut data query time from 1 week to under 2 minutes, and delivered data governance solutions across all subsidiaries.

TECHNICAL SKILLS

Backend	Python (FastAPI, SQLAlchemy, Pytest), Node.js, REST APIs, SSE Streaming, LiteLLM
Frontend	TypeScript/JavaScript, Next.js, React 19, Zustand, React Query, Laravel
AI & Agents	Google ADK, CrewAI, LangChain, RAG (Qdrant), Gemini API, Self-Hosted LLMs (Ollama), MCP
Data Engineering	Snowflake (DMF, Dynamic Tables, Cortex), Medallion Architecture, Data Vault 2.0 (Hubs, Links, Satellites, PIT, Bridge), Airbyte, dbt, Vector Search
Cloud & Infra	GCP (Cloud Run, Cloud Logging), AWS, Docker, GitLab CI/CD, On-Premise
Security	SSO, JWT, MFA, RBAC, API Gateway, Audit Logging, PII Compliance (UU PDP)
Mobile	Android Native (Jetpack Compose)

PROFESSIONAL EXPERIENCE

PT Pupuk Indonesia (Persero), Jakarta Sept 2024 - Present

Software & AI Engineer (SnowPoint Team)

- Engineered PINTER multi-agent AI platform backend (FastAPI + Google ADK), orchestrating 9 AI agents across 7 business units: AEGIS AI, Sentra AI, PAC Agent, AYU, KITA Apps, RAMA, SINTA, Travel Expense, RISK AI Agent.
- Implemented SSE streaming for real-time agent execution with 98%+ uptime, multi-model LLM routing via LiteLLM, vector search (Qdrant), budget enforcement, Human-in-the-Loop approval gates, and safe Python code execution sandbox.
- Reduced LLM inference cost by 90%+ vs Claude-only through task-specific model routing and company-hosted Ollama models.
- Built enterprise RAG over 400+ scanned PDFs with role-based document access, user feedback capture, and self-improving agent workflows.
- Delivered PAC Agent cutting production data consolidation and query from 1 week to under 2 minutes across 5 subsidiaries.
- Implemented SSO, JWT, MFA, RBAC, encrypted API key access, usage tracking, and audit logging via Cloud Run/Cloud Logging.
- Led SnowKeeper and SnowMi governance: unified metadata, automated PII detection via custom Data Metric Functions, Data Vault 2.0 PIT/Bridge tables with sub-second historical queries, Airbyte migration, dbt Sodo scheduler.
- Coordinated 7-person engineering team across AI development, stakeholder delivery, and production support.

PT Ghraha Trimitra Selaras, Jakarta Jan 2024 - Jul 2026

Lead Full-Stack Programmer (Part-Time)

- Built full-stack dashboards (Next.js, Laravel) for parking (GTS Parking) and vending operations (Jetinno Vending) with EDC/QRIS integration to OCBC Bank, supporting ~250 machines across Pekanbaru.
- Engineered real-time monitoring and secure user-management dashboard for KB Bank Mini ATMs on Aisino machines.

PT Pupuk Indonesia (Persero), Jakarta Sept 2023 - Dec 2023

Data Engineer Intern

- Benchmarked leading ETL tools and conducted Snowflake clustering research that informed the organization's data platform architecture decisions.

SELECTED PROJECTS

- **PINTER** (FastAPI, Google ADK, React 19, Qdrant): enterprise AI agent platform with 9 specialized agents, multi-model routing, SSE streaming, RAG, HITL approval gates.
- **Snow Keeper** (Snowflake, FastAPI, FlutterFlow): automated Snowflake resource and access governance across all subsidiaries.
- **DS AI Service** (FastAPI, RAG, Gemini): RAG-based semantic search over company work instructions and guidelines.
- **Nura Academy** (Next.js, Prisma, PostgreSQL): e-learning platform with automated notifications, assignment workflows, unit-test suite.
- **GTS Parking / Jetinno Vending** (Next.js, Laravel, React): real-time parking and vending dashboards with QRIS/EDC payments to OCBC Bank.

EDUCATION

CERTIFICATIONS

Universitas Indonesia
Bachelor of Computer Engineering, 2020 - 2024
GPA 3.63 / 4.00 / Bangkit Academy 2023 (Mobile Development)

LANGUAGES

Indonesian (Native), English (Professional)

Google Cloud AI Live + Labs, Google Cloud	2026
Northstar - Agentic AI, Snowflake	2025
Dataiku Core + Advanced Designer	2025
Enhance Gemini Model Capabilities, Google	2025
Gemini Multimodality & Multimodal RAG, Google	2025
Architecting on AWS, ICS Compute	2024
Machine Learning with Python L1, IBM	2023

LEADERSHIP & COMMUNITY

- Bangkit Academy Class Mentor (2024 - 2025)
- UI Digital Laboratory Teaching Assistant (2022 - 2024)
- Head of R&D, Keluarga Mahasiswa Buddhis UI (2023)
- Dataiku Indonesia User Community, workshop support (2025)
